Why **mint**skills?

The higher education system conventionally produces graduates having academic knowledge but seriously lacking practical training in industry relevant skill sets. Thus, even after obtaining degrees and giving their precious time, **students do not become skilled enough to perform in today's fast paced & highly competitive work environment.**

We intend to **fill this academia-industry gap in collaboration with colleges & institutions** to help students kickstart their career as well trained professionals. Our **Campus to Corporate Training Program** aims to **enable undergraduates and postgraduates with a healthy mix of sales, marketing, analytical and technical capabilities**, making them fit for varied job roles in the fast growing Banking, Financial Services & Real Estate Sector.
